The design guideline

1. Accessibility: Ensure accessibility standards are met.
2. Color Palette: Define primary, secondary, and accent colors, along with text colors.
3. State Colors: Specify colors for hover and press states.
4. Typography: Establish font choices, sizes, and line heights.
5. Spacing: Use consistent spacing units for layout and design.
6. Components: Develop reusable UI components (buttons, icons, forms, navigation, tables, etc.).
7. Additional Usage: Define specific uses for colors in elements like footers and form labels.
8. Documentation: Provide guidelines, best practices, and code snippets for implementation.
9. Design Principles: Emphasize visual hierarchy, reduce interaction costs, maintain consistent patterns, ensure readability, and design for mobile-first.

Hello, I'm

Blen Nigussie

software engineering student

With knowledge in web development and design, I offer quality projects on time.

Hobby

My hobbies are reading novels, exploring poetry, analysing literature, collecting books, visiting libraries, and discovering new authors.

In addition to that I like to listen religious mezmur.

My hobbies are reading novels, exploring poetry, analysing literature, collecting books, visiting libraries, and discovering new authors.

In addition to that I like to listen religious mezmur.

Trip

My trip to Lalibela offers a spiritual journey through Ethiopia's ancient rock-hewn churches, breathtaking landscapes, vibrant local culture, and a glimpse into timeless religious traditions and architectural wonders.
